

Advanced Seminar II

Advanced Seminar II for production and tool-making

Target group:	Technicians, foremen, machine operators, qualified personnel from machine tool construction and production
Objective:	<ul style="list-style-type: none"> - Extension of the knowledge acquired in Basic Seminar I concerning tool and forming techniques and innovative working methods - Application of tools and component groups on BIHLER automatics - Realisation of reduced set-up, adjustment and production times - Expense-reduced optimization of used tools - Increased production efficiency - Introduction to BIHLER novelties
Contents of seminar:	<ol style="list-style-type: none"> 1. Forming technique, progressive production, increased production efficiency 2. Mounting of modular design tools on radial and linear machines 3. Assembly technique 4. Possibilities of movement control by eccentric, cam, servo-drive, hydraulic and pneumatic means 5. Realisation of reduced set-up, adjustment and production times 6. Expense-reduced reconstruction of used tools
Duration:	3 days
Seminar begins:	Tuesday, 08:30 a.m.
Seminar ends:	Thursday, 15:30 p.m.
Attendance:	5 to max. 8
Prerequisite:	Participation in Basic Seminar I <i>A minimum time interval of 6 months between Basic Seminar I and Advanced Seminar II is essential in order to implement the efficiency of Basic Seminar I.</i>
