

## Basic Seminar NC – Tool Design

### Basic Seminar NC for machine tool design

**Target group:** Engineers, technicians, foremen, designers, qualified personnel from planning and design

**Objective:**

- Introduction to NC Technology
- Correct interpretation of NC – process modules
- Design of efficient and flexible production solutions

**Contents of seminar:**

1. Presentation of Bihler NC Machines
2. Presentation of NC process modules
3. Application of Bihler Engineering Tools
4. Application of the Bihler NC construction kit
5. Efficient production
6. Optimal layout design of NC process modules
7. Creating a timing chart for NC technology
8. Overview and functions of the VC 1 control

**Duration:** 3 days

**Seminar begins:** Tuesday, 08:00 a.m.

**Seminar ends:** Thursday, 15:30 p.m.

**Participants:** 3 to max. 6

**Prerequisite:** - none -
